V4-BIOWASTELINK

From regional feedstock to regionally used, EU-compliant fertilisers

Wrocław Tech together with partners from Czechia and Hungary, is implementing the project "V4-BIOWASTELINK – From regional feedstock to regionally used, EU-compliant fertilisers", which aims to create a joint database and map of waste streams in the V4 region. The project supports cooperation between companies, local governments and science through events in Poland, Czechia and Hungary, as well as a fertiliser pilot project in Poland. The project is supported by the Visegrad Fund.
